

IPCI44SCP Quiz A

Create a text file on matrix called: 144qa.txt and answer the following questions:

Only write the question number and the answer. Then submit your quiz A using the following command:

~fardad.soleimanloo/submit 144qa <ENTER>

- 1- What are parallel arrays?
- 2- What is a string in C language?
- 3- In function void foo(const int array[]) what does the “const” keyword do? When should it be used?
- 4- What is the output of this program?

```
#include <stdio.h>
int main(void) {
    int nums[4] = { 2, 6, 3, 8 };
    char chs[4] = { 'A', 'C', 'B', 'F' };
    int i;
    for (i = 0; i < 4; i++) {
        printf("%d%c ", nums[i], chs[3 - i]);
    }
    putchar('\n');
}
```
